JUDGING CRITERIA FOR FOOD PRESERVATION:

(Some of the following information has been taken from the canning and freezing books of Kerr and Ball.) *Safety is of utmost importance. Any entry not in compliance with judging guidelines or exhibiting spoilage will be disqualified. Quality criteria is based on visual judging only.

JARS AND LIDS:

1. REGULATION CANNING JARS MUST BE USED OR ENTRY WILL BE DISQUALIFIED. ONE TRIP JARS like the ones in which you buy commercially canned foods should NOT be used for home canning. For safety's sake containers and closures made and sold especially for home canning must be used.
2. Jars should be sparkling clean for display.
3. Screw bands must be on jars and should be clean and free from rust.
4. Clear jars are preferred; colored or heavily embossed jars make it difficult for the judge to view the product.

5. The jars may be simply adorned if it does not interfere with the judging. Please do not use fabric to decorate lids as it interferes with the efficiency of the judging.

6. FILLED JAR - The top of the finished recipe of liquid covering produce must provide adequate headspace. AIR BUBBLES - must be kept to a minimum, too many constitute spoilage and will be disqualified.

LABELING:

7. A product label, 1" by 2" approximately should be securely attached to the side of the jar. Include (A) product name, (B) preparation method (such as hot pack or cold pack), (C) canning method (such as boiling water or pressure canner), (D) processing time (time it is processed in the canner), (E) pounds of pressure (if pressure canned) Use guidelines from 1990 or newer canning book.

PRODUCT:

8. Fruits, vegetables, or meats in the jar should be cut into uniform pieces and should be of uniform maturity for a more pleasing product. (Overripe products may look coarse or ragged.)

HEAT PROCESSING:

9. METHOD used to heat process foods must comply with current preserving guidelines as stated in the approved reference guides. The boiling-water process for acid food and pressure process for low-acid food are the only recommended methods to preserve food for shelf storage. ALL LOW ACID FOODS SUCH AS VEGETABLES OR MEAT MUST BE PRESERVED FOLLOWING RECOMMENDATIONS AVAILABLE FROM KERR, BALL OR THE EXTENSION EDUCATION SERVICE. Because air is thinner at higher altitudes, adjustments must be made in processing. Additional time must be added to the boiling water bath method and additional pressure must be used with a pressure canner method. If your pressure canner has a weighted gauge rather than a dial, use 15 pounds when canning at high altitudes.

10. Jam and jellies covered with paraffin ARE NOT ACCEPTABLE for exhibit in accordance with USDA recommendations. Seal with new lids and water bath process for 10 to 20 minutes.

11. Dehydrated foods may be presented in any suitable container.

JUDGING:

12. FAILURE TO FOLLOW THESE GUIDELINES MAY LOWER THE RIBBON PLACING.

13. You may enter more than one item per entry number if the procedure, process, recipe or product varies significantly.

14. Exhibits will be DISQUALIFIED if improper jars are used or if foreign objects (insects, hair, dirt, etc.) are discovered. A leaf, seed, skin, or stem related to the product may lower the ribbon placing.

IF YOU HAVE USED AN UNUSUAL RECIPE OR PRESERVATION METHOD, PLEASE INCLUDE A NOTE TO EXPLAIN TO THE JUDGE.

product in each category. If the performance of 4-H members is being evaluated, due consideration of their age and/or development and experience must be taken into account. The entries, exhibits, or contestants are evaluated and arranged into groups for recognition of their achievement based upon how close the exhibit meets the pre-established standards. After evaluation of each item in the class, the entire class may be subdivided into four groups according to their own merit. The groupings or ribbons are as follows:

•**Purple (Superior):** A purple is awarded to those entries that far exceed the average standard or meet the standards established for that particular class. This award indicates a near perfect exhibit.

•**Blue (Excellent):** A blue is awarded to those entries that exceed the average standard. This award indicates a certain degree of excellence that exceeds the average expectation and may be given to multiple participants.

•**Red (Good):** A red is awarded to those entries that meet the average standard or are slightly below the average standard established for that respective class. The general level of accomplishment meets expectations but is less than excellent. Shortcomings are found in certain aspects to cause this ranking.

•**White (Fair):** A white is awarded to those entries that do not meet average standard. The level of accomplishment is less than expected. A ranking of white is deserved due to the severe shortcoming from the good standard.

•**Participation Ribbons:** 4-H Clover Kids (ages 5-7) who are prohibited from participating in any competitive events will be awarded multi-colored participation ribbons with no connotation of placement.

•**Champion and Reserve Rosettes:** Division/Class category champions/reserve champions (as specified by the Fairbook) will receive large rosettes (purple for Champion, pink for Reserve Champion). "Best of Show" rosettes will be awarded to the Overall Champion in the static and livestock exhibits where multiple divisions and classes are under one specific heading. Example: Grand Champion Market Beef or Grand Champion Photography I, II, or III. Overall Awards will not be given in any class that does not show a purple or blue exhibit.

•**Award Stickers:** As a cost saving measure, award stickers signifying the ribbon placing will be attached to all static entry cards and given to all livestock exhibitors to be placed on stall cards. Traditional ribbons will be given to any

exhibitor upon request. Rainbow Ribbons will still be given to all Clover Kids.

4-H PREMIUMS:

•Grand Champion: \$3.00; •Reserve Champion: \$2.50; •Purple: \$2.00; •Blue: \$1.50; •Red: \$1.00; •White: \$0.75

The exhibitor only receives the amount above the resale price. Animals that go through a change of ownership sale are ineligible to show at State Fair, Ak-Sar-Ben, and Western Junior Livestock Show.

A. 4-H member's sale quota will be TWO animals ONLY. It can be a combination of two different species or two animals of the same species. Qualifying animals include beef, sheep, swine, goat, market poultry and market rabbits.

D. 4-H Foundation Livestock Sale is Friday, August 6 at 6 p.m.

E. Exhibitors unable to be present for the sale must provide a written statement in advance to the Foundation Sale Committee and receive approval for their request.

*****IN THE CASE OF SOLD MARKET ANIMALS*****

If there is evidence that an exhibitor violated the quality assurance agreement and has used drugs or other measures to enhance animal presentation while risking the quality of the animal – verified by observation or from testing results after the sale of the animal – the exhibitor will forfeit all monies received back to the buyer and will be subject to one year ineligibility of selling any market animals.

Clothing Guidelines and Rules:

*****ALL CLOTHING PROJECTS (SEWING, KNITTING, CROCHET, SHOPPING & MODELING) WILL BE JUDGED AT PRE-FAIR DAY ON THURSDAY, JULY 29.**

NO CLOTHING WILL BE JUDGED DURING FAIR.***

A. **Entry Tags.** Every clothing exhibit must be described on the appropriate entry tag accompanying it (for example: dark blue wool skirt and jacket, red and white figured blouse). Entry tag placement: as you look at the garment place the entry tag securely using straight pins or safety pins on the right side of the garment and the hook of the hanger to the left.

B. **Identification Labels.** Each item entered as a clothing, knitting or crochet exhibit must have a label attached stating: County, Exhibitor's name and age, project name, and class in which garment is entered, and the number of years enrolled in the project exhibited. Wool entries must have the fiber content listed on the identification label. Attach a label on every component of the outfit using safety pins or by basting. Not responsible for unlabeled items.

C. **Preparation of Exhibits.** Please bring all wearable exhibits on wire hangers or hangers with a swivel hook ONLY. All exhibits not suitable for hanging should be entered in a self-sealing plastic bag hung on a hanger. Wool garments and garments with narrow straps hang better on other hangers, i.e., wooden or notched plastic hangers. As you look at the garment, place the hook of the hanger pointing to the left. Use safety pins to fasten skirts, shorts, and pants to hangers. Each piece should be entered on its own hanger. If more than one hanger is used for an entry, fasten hangers belonging to one exhibit together with twist ties or rubber bands.

D. **Criteria for Judging.** Refer to the Nebraska 4-H website for current state fair scoresheets at www.4h.unl.edu. In addition, all entries must conform to rules and regulations as set forth in the current Nebraska State Fair Book E. Home Environment Department C

Superintendent: Lisa Briggs

Junior Superintendent: Kaylie Phillips

Guidelines and Rules:

HOME ENVIRONMENT EXHIBITS are evaluated by these criteria:

A. **Items must be designed to be used for** home decorating, home furnishing or home management (No clothing, purses, note cards, scrapbooks/photo albums, etc.)

B. **Accessories should be of high quality** (as compared to quick, simple crafts), suitable for use in the home several months throughout the year. Holiday specific items are discouraged. Exhibits made from kits are also discouraged as kits limit decision making in the design process.

C. **Items should show creativity and originality**, along with the application of design principles and elements. (Ask yourself: How have I shown creativity and applied the design principles and elements in this accessory? Youth are required to include this information.)

D. **Entered in correct class:** What medium is the majority of your accessory made from? What was changed or manipulated?

E. **Items should be ready for display in the home** (pictures framed, wall hangings and pictures ready to hang, etc.). No single mat board or artist canvas panels. Wrapped canvas (if staples not visible on edge) is accepted without framing, but still needs to include hanger. MAKE SURE HANGERS ARE STRONG ENOUGH TO SUPPORT THE ITEM!! Items not ready for display will be dropped a ribbon placing.

F. **All static exhibits must have received** a purple ribbon at the county fair to advance to state fair.

G. **Items should not be made for beginning level or other projects** (ex: simple (10 min) table runners or woodworking). Exhibits from the beginning level project, Design My Place, are county only and not state fair eligible.

H. **Number of entries per individual:** No limit of entries in ALL home environment projects per exhibitor.

I. **Entry tag needs to include a clear description of item** (example, blue, 3 drawer dresser). In addition, a label with the exhibitor's name and county should be attached to each separate piece of the exhibit.

J. **Size:** Exhibits may be no taller than 7 feet and no wider than 6 feet.

ALL SUPPORTING INFORMATION: Supporting information is required for all Home Environment exhibits. Information must also include elements or principles of design used and steps taken to complete project. DIVISION 256: HEIRLOOM TREASURES/FAMILY KEEPSAKES

Scoresheet SF206: Class 1

Scoresheet SF205: Classes 2-4

This project area is for items with historic, sentimental or antique value that are restored, repurposed or refinished to keep their original look and value. It is not for “recycled” items. For example, a bench would be considered an heirloom if the original finish is restored, but if decorated by painting it would be considered recycled. Entering highly valuable items (especially small ones) is discouraged, as exhibits are not displayed in closed cases.

NOTE: new resources to support this project area are on the 4-H website. Attach information including:

1. List of steps taken to complete your project. Before and after pictures are encouraged.
2. Keepsakes documentation: how you acquired the item and the history of the item (may be written, pictures, audio or video tape of interview with family member, etc.)

C256001. Trunks. Including doll-sized trunks or wardrobes.

C256002. An Article. Either a repurposed “treasure” (accessory) from an old item or an old “treasure” (accessory) refinished or renovated. May include a display of a collection or collectibles, being careful not to destroy value of the collection.

C256003. Furniture. Either a repurposed “treasure” from an old item or an old “treasure” refinished or renovated. May include doll-sized furniture.

C256004. Cleaned and Restored Heirloom Accessory or Old Furniture. A reconditioned and cleaned old piece of furniture or accessory that is functional for use or display. Item might be cleaned and waxed, and simple repairs made. Item would not be refinished or repainted, but reconditioned to restore it to its original look or to prevent it from further damage as a valuable heirloom. Consult extension publication Care and Conservation of Heirloom Textiles, G1682 for information on textiles. (Refinished items go in classes 2 – 3.) This class is for situations where it may be best to do very little to the item to maintain its antique value. Item or article should be of complexity suited to an advanced project.

Human Development Department C

Superintendent: Lisa Briggs

Junior Superintendent: Kaylie Phillips

Guidelines and Rules:

The term Human Development includes childcare, family life, personal development, and character development. To learn characteristics of suitable and unsuitable toys and characteristics of children at various stages of development, please refer to the new 4-H online resource: <https://unl.box.com/s/eoigrjsuq67yvtq1def160mmjuhozvck> - What It Takes to Be Your Teen Babysitter. In addition another resource that will assist youth in understanding young children is the Nebraska Early Learning Guidelines – <https://go.unl.edu/dpg9>.

Information sheets for Classes 1 - 6 should include: Final ribbon placing of the exhibit will include the completeness and accuracy of this information sheet.

- 1) Where did I get the idea for this exhibit?
- 2) What decisions did I make to be sure exhibit is safe for a child to use?
- 3) What age is this toy, game or activity appropriate for and why? (Infant, Birth – 18 mos.; Toddlers, 18 mos. – 3 yrs.; Preschoolers, 3-5 yrs. or Middle Childhood, 6-9 yrs.) Give 2 examples that help in understanding the appropriateness of this exhibit for the age of the child (see project manuals).
- 4) How is the toy, game or activity intended to be used by the child? Information sheet for Class 8 (Babysitting Kit) should include:
 - 1) What are children this age like? Give 2 examples to show how the kit would be appropriate for children this age.

2) What will the child learn or what skills will they gain using the kit?

3) What item(s) was made by the 4-H'er. 4-H'er should make one or more items in the kit, but purchased items are also allowed. (It is highly suggested that an inventory list of items in the kit be included).

Exhibitors in the Human Development project area will be asked to focus on designing toys/games/activities that meet the different needs of children. Categories are based on the Early Learning Guidelines in Nebraska, which identify the important areas in which our children should grow and develop. Use the Nebraska Department of Education website and the resources around the Early Learning Guidelines to help understand the six areas and the skills children need to develop to create your exhibit, in conjunction with your project manual. All static exhibits must have received a purple ribbon at the county fair to advance to the State Fair. <https://www.education.ne.gov/oec/earlylearning-guidelines/>

Quilt Quest Department C

Superintendents: Stephanie Cogdill, Kris Vahrenkamp, and Julie Schommer

All static exhibits must have received a purple ribbon at the county fair to advance to the State Fair. Premier 4-H Science Award is available in this area. Please see General Rules for more details.

Exhibit Guidelines:

In Quilt Quest, 4-H'ers learn skills as they progress through the project. The least experienced 4-H exhibitor will select fabric, cut, and sew together only squares or rectangles in making the quilt top. They may have additional guidance in piecing the quilt block and layering together the quilt top, inner batting and the quilt bottom. Another person can do the quilting for them.

In the Premier class, the 4-H'er has developed skills to be able to do all of the work by himself/herself. This includes pattern and fabric selection, cutting and

sewing individual pieces, layering the quilt top/batting/backing together, and quilting. Quilting may be done by hand, by sewing machine or by a commercial-grade quilting machine. After quilting, the 4-H'er must finish the quilt by "squaring it up," put binding on the edge, and placing a label on the quilt, which provides details about the quilt making process for historical purposes.

All entry cards and support information must be attached using a safety pin. **No straight pins.** When judging Quilt Quest exhibits, the judges consider SF209 "Standards for Judging Quilts and Quilted Items."

For all classes, 4-H'ers can choose fabrics for the quilt by selecting fabric from fabric bolts. 4-H'ers may also use "fabric collections" offered by manufacturers in a particular designer or fabric line. Examples of fabric collections include:

- Jelly Rolls** are made of (up to) 40 different strips of 2 1/2" wide fabric laying on top of one another and rolled up to look like a jellyroll. The fabric is created by one designer or fabric line and compliments each other. In many cases, less skilled 4-H'ers find it difficult to cut narrow strips with a rotary cutter and ruler, so this fabric selection may make it easier as they learn.

- Honey Buns** are made like the Jelly Rolls with 1 1/2" strips of fabrics.

- Layer Cakes** are 10" squares of fabric from a manufactured designer or fabric line with different pieces of fabric "layered" on top of one another to look like a piece of cake.

- Charm Packs** are made of 5" squares of coordinating fabric and may be tied up with a string or scrap of fabric.

- Candies** are 2 1/2" squares of fabric from a manufactured designer or fabric line.

- Turnover** is a collection of coordinating fabrics that are cut into 6" triangles.

- Fat Quarters** are 1/2 yard cuts of fabric which are cut in half to make a rectangle that is approximately 18" X 21". (One half yard of fabric yields 2 fat quarters). The "fat quarter" can be more economical to purchase for a smaller quilt because the purchaser does not have to buy the entire yardage width.

- Fabric Kit** is a collection of fabrics cut in large pieces to accommodate the requirements of a particular quilt pattern. The 4-H'er must cut out all of the smaller squares, rectangles, etc. to make the quilt top according to the pattern directions.

After fabric selection, youth can use a variety of tools for cutting the fabric and completing the quilt. Cutting into pattern pieces may include hand roller die cutting machines that cut particular shapes, which can be applied, to fabric. This is allowed in the construction of the quilt.

- A quilted exhibit is made up of at least 3 layers. Exhibits must be quilted or tied through all layers.

- Fleece blankets are not eligible in this division.

- Quilts must have a permanent label on the back in the bottom right corner with quilter's name and date of completion.

•A quilted exhibit consists of 3 or more layers.

•All quilted exhibits must be quilted (machine or hand) or tied.

•All quilt piecing and finishing must be the sole work of the 4-H member. Quilting, whether machine or hand quilted, may be done by another individual except for the Premier Quilt class.

•No pre-quilted fabric may be used.

•Wall quilts must have a hanging sleeve on the back of the quilt or some method for hanging.

•All quilted exhibits must be clean and finished for intended purpose.

•On a half sheet of 8 1/2" X 11" paper, include an explanation answering the following questions: A) How did you select the design and fabrics including whether or not you used a kit, jelly roll, charm squares, etc.? B) What did you do and what did others do? C) What did you learn you could use on your next project?

General Information:

A. Show What You Did & Learned. All exhibitors will show evidence of their personal field experiences, study, or observations that relate to their exhibit. This helps judges understand what the 4-H'er did and learned in the process that led to the exhibit.

B. Proper Credit. Show proper credit by listing the sources of plans or other supporting information used in exhibits.

C. Whose Exhibit. The exhibitor's name, county and age must be on the back or bottom of all displays .

D. Wildlife & Wildlife Laws. "Animal" or "wildlife" in the following classes includes wild fish, amphibians, reptiles, birds, or mammals. Please make sure you are following all appropriate wildlife laws.

E. Project Materials. Related project booklets include Exploring Your Environment Series, 4-H Shooting Sports, Amphibians, Bird Behavior (EC 59381), Fishing for Adventure Project Manuals, Wildlife Conservation (4-H 125), Geology and Outdoor Adventure. Other resources include: Outdoor Skills: Learning Science in the Outdoors series (Science Signature Outcome Program) outdoornebraska.gov/afterschool/ and www.whep.org.

F. Board & Poster Exhibits. These are displays that show educational information about a topic of interest. Board exhibits can hold objects such as fishing equipment or casts of animal tracks. Mount all board exhibits on 1/4" plywood, masonite, or similar panel no larger than 24" X 24" wide. Poster exhibits should be on regular poster sheets, no larger than standard size (22" X 28"), but half size (22" X 14"), is recommended.

G. All static exhibits must have received a purple ribbon at the county fair to advance to the State Fair.

DIVISION 340: WILDLIFE AND HOW THEY LIVE

Wildlife and How They Live (Classes 1-4)

Classes 1-4 are board or poster exhibits. Display may show any aspect of

wildlife, wildlife habitat, or related conservation, restoration, or management. Examples: life history or other facts about one type of wildlife; how to manage wildlife on a farm or in town; managing habitat for one kind of wildlife; life requirements for one kind of wildlife during one season or through the year; wildlife study methods; wildlife behavior (example: when nesting, finding food, moving, etc.); habitats (examples: grasslands, wetlands, river or stream corridors) and what wildlife is found there; habitat needs for a specific kind of wildlife. For more ideas, refer to project booklets.

D340001. Mammal Display. (SF154)

D340002. Bird Display. (SF154)

D340003. Fish Display. (SF155)

D340004. Reptile or Amphibian Display. (SF156)

D340005. Wildlife Connections. (SF157) Board or poster exhibit. The purpose of this display is to show interconnections and related aspects among animals, plants, and other habitat components. All displays should show two or more interactions (connections) that occur between/among animals or between animals and their habitat. Displays might show how animals interact with other animals, with people, or with their habitat.

Examples:

1. Food chain display. Use pictures, drawings, or other items to illustrate the source of food energy and where it goes - who eats whom or what. Use arrows to show the direction of the energy (food) flow.

2. Show the role of predators, scavengers, insect eaters, or others in nature.

3. Show how wildlife numbers (populations) change through the year or with their habitat.

4. Show predation, competition, or other behavioral interactions of wildlife.

5. Choose one kind of wildlife and make observations through a season or year, keep notes of interactions, then make a display of what you saw.

6. For more ideas, refer to project booklets.

D340006. Wildlife Tracks. (SF158) Board or diorama-type box exhibit. Make a display of animal tracks using plaster-of-paris casts. There are three options. For options, include a brief description of your experiences in making the tracks so the judges better understand what you did and learned. Positive casts (impressions as they would be in nature) are preferred.

1. Option 1 should show plaster-of-paris tracks of five or more kinds of wildlife along with a picture or illustration of each kind of animal. OR

2. Option 2 should show two or more plaster-of-paris tracks of one specific kind of wildlife and should include a picture or illustration of the animal, what the animal may eat, and what may eat the animal.

3. Option 3 should show two tracks and include the animal's habitat needs including preferred food, shelter, water and space in addition to picture or illustration of the animal.

D340007. Wildlife Knowledge Check. (SF159) Use electrical circuits, pictures, or other methods of teaching wildlife identification or other wildlife related knowledge. Plan size and shape to fit transportation and display; maximum size 24" X 24". Example: prepare a list of animals and questions about where each would most likely live. Rabbits brushy areas along field borders; ducks-marshes, etc.

D340008. Wildlife Diorama. (SF160) Box must be no larger than 24" X 24". The exhibit might show grassland, prairie, agricultural, woodland, riparian (stream or river corridor), wetland, and/or other area with wildlife habitat. Example: show a large unbroken grassland or prairie for species such as meadowlarks, greater prairie chicken, lark bunting, grasshopper sparrows, Ferruginous hawk, burrowing owl, horned lark, upland sandpiper, or pronghorn; AND/OR show an area interspersed with several habitats such as windbreaks, farm fields, woods, waste areas, ditches, and pastures for edge-adapted species such as white-tailed deer, Northern bobwhite, mourning doves, cottontail rabbits, fox, squirrels, Northern cardinals, or blue jays. Label the habitats displayed and show at least five kinds of wildlife in their proper habitats.

D340009. Wildlife Essay. (SF161) Learn how to share educational information by writing. Choose a conservation or wildlife topic that interests you and write an essay about it. For example, write about a particular species of wildlife that you have observed or about the values of wildlife. You might write about wildlife on a farm, in town, in a backyard, at a backyard feeder, or at other places. You might write about hunting, fishing, or ethics and proper behavior for hunting or fishing. For other ideas, refer to project booklets. The essay should be between 100 and 1000 words long and should be typed, double spaced, or written so that it can be easily read. Standard size paper (8 1/2" X 11") format is preferred. You might use books, magazines, or personal interviews as resources, but you must give credit to all sources by listing them.

D340010. Wildlife Values Scrapbook. (SF162) Make a scrapbook about the various values of wildlife following guidelines in the Wildlife Conservation project booklet (4-H 125).

D340011. Wildlife Arts. (SF163) The purpose of this class is to allow artistic exhibits that contain educational information about conservation and wildlife. Examples might include paintings, photographs, woodcarvings, painted duck decoys, or songs or poems written by the exhibitor. Entries must be appropriate for fair display and no larger than 24" X 24". For example, paintings or photographs should be displayed in notebook format or mounted on a sturdy display panel. All entries must include a title and brief explanation of the purpose or message (what is the exhibit meant to show).

DIVISION 342: WILDLIFE HABITAT

D342001. Houses. (SF165) Make a house for wildlife. Examples: bird house (bluebird, purple martin, wood duck, kestrel, barn owl, etc.) or bat house; no insect houses. Make the house functional so that dimensions, hole size etc. are appropriate to fit the intended species' needs. Include the following information: 1) The kinds of animal(s) for which the house is intended. 2) Where and how the house should be located for best use, and 3) Any seasonal maintenance needed. Tips: check NebGuide on birdhouses and shelves.

D342002. Feeders/Waters. (SF166) Make a birdbath or feeder. Examples: seed, suet, or nectar feeders. Squirrel feeder okay; no insect feeders. Indicate the kinds of animal(s) for which the feeder or waterer is intended. Make the feeder or waterer functional so that it fits wildlife needs. Include the following information:

- Where and how the feeder or waterer should be located for best use
- How it should be maintained. Tips: check NebGuide on feeding birds:

<https://wildlife.unl.edu/pdfs/feeding-birds.pdf>

D342003. Wildlife Habitat Design Board or Poster Exhibit. (SF167) Board or poster exhibit. Choose a backyard, acreage, or farm, and design a habitat plan to meet the food, water, shelter, and space needs of at least three kinds of animals you would like to attract. Draw an outline of the area and show what plants or other habitat will be provided. Indicate how the various parts of your plan provide the desired habitat needs. You might include an aerial photo of the area if you have one. For ideas, check the Wildlife Habitat Evaluation Handbook, Participant's Manual (NE 4H4300).

DIVISION 343: HARVESTING EQUIPMENT

DIVISION 361: OTHER NATURAL RESOURCES

D361001. Design Your Own Exhibit in Natural Resources, Conservation, Geology, or Ecology. This class is for educational exhibits about natural resources, conservation, wildlife, or ecology that do not fit into other categories. Entries must be appropriate for fair display and no larger than 24" X 24". All entries must include a title and should be clear (a brief explanation or other method) about the intended purpose or message – what the exhibit is meant to show. Think about accuracy, creativity, and educational value for viewers, and evidence of exhibitor's personal experiences and learning.

General Information:

Insect Collections

Specimens in display collections should be mounted properly and labeled with location and date of collection, name of collector, and order name. Follow mounting and labeling instructions in the Nebraska 4-H Entomology Manual. Boxes are preferred to be 12" high x 18" wide and landscape orientation, so they

fit in display racks. Purchase of commercially-made boxes is allowed. All specimens must be from the collector. All static exhibits must have received a purple ribbon at the county fair to advance to the State Fair. Exhibitors may, and should, correct and update collections for competition at the State Fair.

DIVISION 800: ENTOMOLOGY

H800001. Entomology Display, First-Year Project. (SF186) Collection to consist of 25 or more different kinds (species) of insects representing at least 6 orders. Limit of one box.

H800002. Entomology Display, Second-Year Project. (SF186) Collection to consist of a minimum of 50 kinds (species) of insects representing at least 8 orders. Replace damaged or poorly mounted specimens. About 25 species should be present from after July 1 of the previous year. Limit 2 boxes.

H800003. Entomology Display, Third-Year or More Project. (SF186) Collection to consist of a minimum of 75 kinds (species) of insects representing at least 10 orders. Replace damaged or poorly mounted specimens. About 25 species should be present from after July 1 of previous year. Limit of 3 boxes.

H800004. Special Interest Display. (SF187) Educational display developed according to personal interests and/or advanced identification capability. This also is an opportunity to highlight favorite insects in a creative arrangement. Insects should conform to pinning and mounting standards as in Classes 1-3 and be protected in an insect box. Each specialty display should include names of the insects, interesting information about them, and why the display was made. Advanced identification collections should have insects grouped with labels that correspond with identification level (e.g. family, genus, and species). A specialty collection may consist of insects by taxonomic group (e.g. butterflies, grasshoppers, dragonflies, scarab beetles) or by host, subject or habitat (e.g. insect pests of corn, aquatic insects, insect mimicry, insect galls, insects from goldenrod, insect pollinators, etc).

H800005. Insect Habitats. (SF188) Habitats consist of any hand-crafted objects, made of natural or artificial materials which are placed outdoors, which promote or conserve insects in the environment. Insects may include bee pollinators, butterflies, beneficial insects, etc. A one-page report describing activities must accompany the exhibit.

H800006. Macrophotography. (SF189) Subjects should be insects, spiders or other arthropods, or any nests, webs or constructions they make. All exhibit prints should be 8 1/2" X 11" and mounted on rigid, black 11" X 14" poster or mat board. Either orientation is acceptable. No frames or mat board framing is allowed. A caption of a few sentences should explain the subject, and be printed on white paper, and be glued below the print on the poster board.

H800007. Insect Poster/Display Exhibits. (SF189) Exhibits can be posters or three-dimensional displays, and artistic creativity is encouraged. Posters should be no larger than 22" X 28". They should be instructional and can be attractive and have pictures, drawings, charts, or graphs. Posters and displays may show any aspect of insect life, habitat, or related conservation or management. Examples include life history and other facts about an insect; insect anatomy; how to manage insects in a farm, home, lawn, or garden setting; experiences rearing one kind of insect; survey of an important insect; insect behaviors (ex. Nesting, finding food, mobility, defenses, etc.); habitats (e.g. forests, grasslands, wetlands, rivers, or lakes) and what insects are found there, etc. Three-dimensional displays, such as dioramas, sculptures, models or decorative boxes should have a page of explanatory information accompanying them and fit within a 22" X 28" area.

H800008. Reports or Journals. (SF189) Reports and journals should be in a 3-ring-binder. A report may be informational, that is, an original article about a favorite insect, a history of insect outbreaks, diseases caused by insects, insects as food, etc. Or, it may be a research report about an investigation or experiment done in a scientific manner. It then should have a basic introduction of the insect, methods used, observations, and results of the project. Tables, graphs and images are helpful to include. A journal is an observational study over a period of time with personal impressions. It may cover watching changes of kinds of butterflies over the summer, rearing a

specific insect from egg to adult, managing a beehive, observations of insects in a specific habitat, accounts of insect behavior in a forest or flower garden, etc.

General Information:

1. **The official reference for all forestry projects is the Tree Identification Manual** (4-H 332) <https://marketplace.unl.edu/ne4h/4h332.html> which was recently revised and is available for purchase from UNL Marketplace. Other helpful forestry references include Trees of Nebraska (EC 92-1774-X), Leafing Out (4- H431) and Plant a Tree (EC 17-11-80).<https://marketplace.unl.edu/ne4h/leafing-out.html>

2. **Display "boards"** must be made from wood or wood composite, e.g. plywood, fiberboard, or masonite, 1/4" to 1/2" thick and no larger than 24" X 24". Display boards may be coated, e.g., painted or varnished, on both sides to prevent warping.

3. **Display "posters"** must be made from a material, e.g. foam board or poster board, that will stand upright without buckling, and be no larger than 24" X 24".

4. **Display "books"** must measure no more than 16" X 16".

5. **At least 5 of the 10 samples** in Class 2, 3, 4, and 5 must be from the list of 60 species described in 4-H 332. Samples must be from 10 different tree species. For example, Emerald Queen Maple and Crimson King Maple are both varieties of the same species (Norway Maple), and thus have the same genus and species name, i.e. Acer platanoides. All samples must be from trees, NO shrubs. If more than 10 samples are included in the display, only the first 10 samples from the current year will be judged.

6. **Due to emerald ash borer infestation, no true ash species** (Green Ash, White Ash, Black Ash, or Blue Ash) may be included in any collections. Inclusion of a true ash species will result of the project being disqualified.

7. **Remember that other general labeling standards apply.** For example, scientific names are always italicized or underlined. Also, the first letter of a Genus name is always capitalized. The first letter of a species name is always lower case. When required, always indicate complete scientific names (Genus and species) and common names, (e.g. Norway Maple) even when "variety names" are included. For example, the scientific name of Emerald Queen Maple is Acer platanoides and the common name is Norway maple. "Emerald Queen" may be included as the variety name, but variety names are not required.

8. **How well the exhibitor follows written directions is an important factor in judging.**

DIVISION 320: FORESTRY

D320001. Design-Your-Own Exhibit. (SF31) Prepare an educational exhibit about some aspect of trees, forests, or forestry that is of special interest to you. Possible topics include paper recycling, wildfire, forest products, forest wildlife, or forest pests. The only requirement is that the display must be no larger than 24" X 24" X 24". Photographs, drawings, samples, charts, posters, etc. can be used, but include enough information to adequately explain the topic. Your display should

be substantially different from other display classes. Be as creative as you like.

D320002. Leaf Display. (SF32) The leaf display must include samples of “complete leaves” from at least 10 different tree species. The display must include at least two samples of simple leaves, compound leaves, and conifer leaves. Leaves should be pressed, dried, and mounted. **Collection:** Whenever possible, collect leaves from mature trees. Collect leaves any time after they have reached full size, usually beginning in early summer. Leaf samples should be in good condition and representative of the average leaves on the tree. Keep in mind that shaded leaves are often much larger than normal. Carefully remove leaves from the twig with the entire petiole or rachis intact. After collection, fresh leaf samples can be temporarily stored within the pages of an old magazine, but they should be properly pressed and dried for display. Be sure to record pertinent information during collection. **Mounting:** Leaves may be displayed in a notebook or on a display board. Any method may be used to mount leaves, e.g. wire, glue, tape, staples, plastic bags, but be sure all their features can be clearly identified. **Labeling:** The label for each sample must include: 1) Common name; 2) Scientific name; 3) Leaf type; 4) Leaf arrangement (for broadleaf trees); 5) Leaf composition (for broadleaf trees); 6) Exhibitor’s name; 7) Collection date; 8) Collection location (be specific, state and county at a minimum). If a twig is included with a sample, indicate, “twig included” on the label. For example, the twig may be included with an eastern red cedar sample because the leaves are very small and difficult to remove from the twig. Supplemental information, e.g. general uses, common products, fall color, etc., may be included to enhance educational value.

D320003. Twig Display. (SF33) The twig display must include twig samples from at least 10 different tree species. The display must include at least two samples of opposite and alternate leaf arrangements from broadleaf trees. **Collection:** Twig samples should be collected during the dormant season (November – April) when the buds are mature. Twig samples must be at least 6” long and exhibit buds. Leaves must be removed and side branches must be trimmed to less than 1” in length. **Mounting:** Twigs must be mounted on a display board. Any method, e.g. wire, glue, tape, staples, plastic bags, etc., may be used to mount twigs, but be sure all features can be clearly identified. The non-terminal end must be cut at a slant so the pith can be seen. **Labeling:** The label for each sample must include: 1) Common name; 2) Scientific name; 3) Leaf arrangement (for broadleaf trees); 4) Exhibitor’s name; 5) Collection date; 6) Collection location (be specific, state and county at a minimum). Supplemental information, e.g. general uses, tree characteristics, etc., may be included to enhance educational value.

D320004. Seed Display. (SF34) The seed display must include seed samples from at least 10 different tree species. **Collection:** Tree seeds should be collected at the time of year when they mature, which varies widely depending upon tree species. For example, Silver maple seeds mature in May while red oak acorns do not mature until September. Seed samples should be free of insect or disease symptoms. Remember to display seeds, not fruit. For example, the seed of honey locust is enclosed in a pod. Remove and display the seed, not just the pod. It is acceptable to display the fruit with the seed, but clearly label each. **Mounting:** Seeds may be displayed in a variety of ways, e.g. mounted on a display board, displayed in jars in a rack, etc., but they must be securely

mounted and easily viewed. Be as creative as you like. **Labeling:** The label for each sample must include: 1) Common name; 2) Scientific name; 3) Type of fruit, if known (e.g. samara, pod, nut, legume, etc.); 4) Exhibitor’s name; 5) Collection date; 6) Collection location (be specific, state and county at a minimum). Supplemental information, e.g. maturity date, average number of seed in the fruit, etc., may be included to enhance educational value.

D320005. Wood Display. (SF36) The wood display must include wood samples from at least 10 different tree species. **Preparation:** Samples may be of any shape, e.g. sections from a board, wood cylinders turned on a lathe, horizontal or vertical cross sections of a small log with bark attached, etc., but all samples should be the same shape, e.g. all wood cylinders or all sections of a board. Each sample can be no larger than 4” X 4” X 4”. Cut surfaces should be sanded to show the grain. Treating samples with a clear finish (no stain) is optional. **Mounting:** Samples may be displayed in a variety of ways, e.g. mounted on a display board, displayed in a box or rack, etc., but they must be securely mounted and easily viewed. Be as creative as you like. **Labeling:** The label for each sample must include: 1) Common name; 2) Scientific name; 3) Wood type (softwood or hardwood); 4) Exhibitor’s name; 5) Collection date; 6) Collection location (be specific, state and county at a minimum). Supplemental information, e.g. common products, wood density, etc., may be included to enhance educational value.

D320006. Cross Section. (SF38) Display a disc cut from a tree species listed in 4-H 332. The sample must be collected within one year of the state fair judging day. The disc must measure 6” to 12” in diameter and 1” to 3” thick. The bark should be firmly attached, which may be difficult if the tree was dead when the disc was cut. Sand at least one side of the disc so the grain can be easily seen. If the disc is treated with a clear finish, both sides must be treated to minimize warping. As the disc dries, some cracking or checking can be expected and is allowed. **Labeling:** The following parts must be clearly and accurately labeled on the cross section with pins, paper tags, or some other form of identification: a) Pith; b) Heartwood; c) Sapwood; d) One growth ring (beginning and end); e) Cambium; f) Bark. A separate label attached to the back of the disc must include: 1) Common name; 2) Scientific name; 3) Tree classification (softwood or hardwood); 4) Age (of the cross section); 5) Exhibitor’s name; 6) Collection date; 7) Collection location (be specific, state and county at a minimum)

D320007. Parts of a Tree. (SF39) (This project is only for ages 8 – 11) Prepare a poster, no larger than 24” X 24” that clearly identifies the main external parts of any tree: a) Trunk; b) Crown; c) Roots; d) Leaves; e) Flowers; f) Fruit; g) Buds; h) Bark. Identifying other internal parts, e.g. phloem, xylem, cambium, annual ring, pith, etc., is optional. Attach a separate label on the back of the poster that includes the exhibitor’s name and age.

D320008. Living Tree. (SF40) Display a living tree seedling grown by the exhibitor from seed in the display container. The seed must be from a species listed in 4-H 332. The seedling must be 60 days to 1 year old (on State Fair judging day). The display container must contain at least 8 inches of soil (potting mix or suitable natural soil), have drainage hole(s), and a drain pan to catch drainage water. **Labeling:** A waterproof label must be attached and include: 1) Common name; 2) Scientific name; 3) Seed treatments (if any); 4) Planting date; 5) Emergence date; 6) Exhibitor’s name. Supplemental information about the tree, e.g. where the seed was collected, growth measurements, uses for that species, etc., may be included in an attached notebook, poster, etc. to enhance educational value. Supplemental information will be an important factor in judging.

General Information:

A. The name and county of each exhibitor should appear separately on the back of each board, poster or article and on the front cover of the notebooks so owner of exhibit may be identified if the entry tag is separated from the exhibit.

B. Each individual is limited to one exhibit per class. All static exhibits must have received a purple ribbon at the county fair to advance to the State Fair.

C. Several classes require a display board, which should be a height of 24 inches, and not to exceed 1/4" in thickness. A height of 24 7/8" is acceptable to allow for the saw kerf (width) if two 24-inch boards are cut from one end of a 4' x 8' sheet of plywood. Nothing should be mounted within 3/4" of the top or bottom of the board. (Example: Woodworking & Electricity.)

D. Fabricated board such as plywood, composition board, or particle-type lumber may be used for demonstration displays.

E. Demonstration boards should be sanded and finished to improve their appearance. The finish on a demonstration board will be judged as a woodworking exhibit.

F. Demonstration boards should include an overall title for the display, plus other necessary labeling.

G. Reports should be written using the scientific method whenever possible (Background, the Question or hypothesis, what you plan to do and what you did, Method used and observations, Results: what you learned). All reports should be computer generated and enclosed in a clear plastic cover. The reports should be attached securely to the display.

DIVISION 850: AEROSPACE

•Rockets must be supported substantially to protect the rocket from breakage. Rockets are to be mounted on a base that has dimensions equal or less than 12" X 12" and the base should be 3/4" thick. No metal bases. If the rocket fins extend beyond the edges of the required base (12" X 12"), then construct a base that is large enough to protect the fins. The base size is dictated by the size of the rocket fins.

•The rockets must be mounted vertically. Please do not attach sideboards or backdrops to the displays. In addition, a used engine or length of dowel pin is to be glued and/or screwed into the board and extended up into the rockets engine mount to give added stability.

•Rockets must be equipped as prepared for launching, with wadding and parachute or other recovery system. Rockets entered with live engines, wrong base size or sideboards will be disqualified.

•A report, protected in a clear plastic cover, must include: 1) rocket specification (include original or photo of manufacture packaging stating rocket skill level, 2) a flight record for each launching (weather, distance, flight height), 3) number of launchings, and 4) flight pictures, 5) Safety (how did you choose your launch site? Document safe launch, preparations, and precautions, 6) objectives learned and 7) conclusions.

•The flight record should describe engine used, what the rocket did in flight and recovery success. Points will not be deducted for launching, flight or recovery failures described. This includes any damage that may show on the rocket. Complete factory assembled rockets will not be accepted at the State Fair.

•Judging is based upon display appearance, rocket appearance, workmanship, design or capabilities

for flight, and number of times launched and report. Three launches are required to earn the 9 maximum launch points given on the score sheets. For scoring for the State Fair, only actual launches count, misfires will not count towards one of the required three launches.

- For self-designed rockets only, please include digital recorded copy of one flight. In the documentation please include a description of stability testing before the rocket was flown.

- Skill level of project is not determined by number of years in project. Skill level is determined by the level listed on the manufacturing packaging.

- 4-H Rocket project levels are not intended to correspond to National Association of Rocketry model rocket difficulty ratings or levels.

- High power rockets (HPR) is similar to model rocketry with differences that include the propulsion power and weight increase of the model. They use motors in ranges over “G” power and/or weigh more than laws and regulations allow for unrestricted model rockets. These rockets are NOT appropriate for 4-H projects and will be disqualified.

- Youth enrolled in Aerospace 2,3, or 4 may exhibit in any class within this division.

4-H Welding Project Tips and Suggestions

CLASS 1

1. All welds should be made with the same electrode/wire/rod size and number.
2. Welds should be made only on one side of metal so penetration can be judged.
3. Welds should be cleaned with chipping hammer and wire brush. Apply a coat of light oil (penetrating oil) to the metal to prevent rusting. Wipe off excess oil.

4. It is suggested that all welds be on the same size and thickness of metal. These pieces, referred to as coupons, should be 1.5 to 2 inches wide and 3.5 to 4 inches long. A good way to get this size is to buy new cold rolled strap iron and cut to length. The extra width is needed to provide enough metal to absorb the heat from the welding process and prevent the coupons from becoming too hot before the bead is completed. Narrower coupons will become very hot, making an average welder setting too cold at the bead start, just about right in the middle, and too hot at the end. The correct way to weld narrow strips is to make short beads and allow time to cool, however this project requires a full-length bead.

Stick welding:

- Suggested coupon thickness- 1/4" if using 1/8" rod
- Suggested rod-AC and DC straight or reverse polarity- first E-7014, second E-6013 MIG welding:
- Suggested coupon thickness-1/4" if using .035 wire and 1/8" if using .023 wire Oxy-Acetylene:
- Suggested coupon thickness- 1/8"
- Suggested rod- 1/8" mild steel rod

CLASS 2

1. It is suggested that all welds be on same size and thickness of metal. These pieces are referred to as coupons. The welds can be on one coupon that is about 4" X 4" or on individual coupons that are about 2" X 4" inch and 1/4 1/4" thick. Suggested rods for this class of position welds for AC and DC straight or reverse polarity is, first E-6013, second E-7014 and E-6010 for DC reverse polarity only.

2. Welds should be cleaned with a chipping hammer and wire brush. Apply a coat of light oil (penetrating oil) to the metal to prevent rusting. Wipe off excess oil.

3. 4-H Welding Project Tips and Suggestions: Class 3 & 4 1. All welds should be cleaned and protected from rust with paint or light oil. Plans are to be complete enough that if they were given to a welding shop, the item could be made without further instructions. Bill of materials should include a cost for all items used including steel, electrodes, paint, wheels, etc.

Junior Superintendent: Kaylie Phillips

General Information:

A. **The purpose of a Veterinary Science exhibit** is to inform the public about a common health problem of animals or a veterinary science principle. Do not confuse veterinary science exhibit topics with animal husbandry, history or production topics.

B. **A Veterinary Science exhibit may consist of a poster, notebook or a display.** The exhibit may represent material from exhibitors enrolled in Animal Disease or Animal Health. If photographs are to be part of the exhibit, remember that the public will view them. Make sure that the photographs are in good taste and will not be offensive to anyone. Graphic photographs of excessive bleeding, trauma or painful procedures are not appropriate. For exhibits related to veterinary surgical procedures, aseptic techniques need to be shown, for example, use of drapes, use of sterile procedures, wearing of gloves, and other appropriate veterinary medical practices. All static exhibits must have received a purple ribbon at the county fair to advance to the State Fair.

C. **First-Aid Kits: Because of public safety concerns and risk of theft of first-aid kit contents (veterinary drugs/equipment) with perceived potential for drug abuse, animal first aid kits containing any drugs or medications will be immediately disqualified and not displayed.** First Aid kits wishing to include medication information should instead utilize written descriptions, photographs, drawings, computer generated print-outs or empty packaging of pharmaceuticals.

D. **Veterinary Science Posters:** This exhibit presents the viewer with a design that is simple and direct, unlike a display that usually presents more information. A poster should not exceed 22" X 28" and may be either vertical or horizontal.

E. **Veterinary Science Displays:** A display may include but is not limited to: a 3-dimensional exhibit, a scale model, the actual product (for example: skeleton; teeth; samples of leather, fur, or dried skin damaged by disease or parasites) or a notebook. A display is not a poster. A display may be mounted on poster board not to exceed 22" X 28" or on 1/4" plywood or equivalent that does not exceed 24" high or 32" wide or in a three ring binder or another bound notebook format.

Appropriate Veterinary Science Topics:

- Maintaining health
- Specific disease information
- Photographic display of normal and abnormal characteristics of animals
- Animal health or safety
- Public health or safety
- Proper animal management to ensure food safety & quality
- Efficient and safe livestock working facilities
- Or a topic of the exhibitors choosing related to veterinary medicine or veterinary science

**Remember, since these are science displays, all references and information needs to be properly cited. Proper sources include but are not limited to: Professional journals and publications, professional AVMA accredited websites, interviews with Veterinarians and excerpts from Veterinary Educational Literature.

16.1.3 ANIMAL EXHIBITS FOR CLOVER KIDS

Animals and animal subject matter can contribute to Clover Kids objectives. However, for safety, liability, and competitive reasons often associated with livestock shows, some restrictions are necessary to maintain Clover Kids program objectives. <https://4h.unl.edu/policy-handbook/section-16>.

- Children eight and under often lack the mental and physical skills for controlling and understanding the strength of large animals (Livestock Conservation Institute, 1994).

- Young children may lack the strength, balance, and attention span to adequately manage large animals (American Medical Equestrian Association, 1993).

Because of these reasons, Clover Kids programs involving live animals must adhere to the following:

- Exhibition only includes enrolled 4-H Clover kid members, 4-H does not sponsor or support peewee events or exhibition. Pee wee referring to non 4-H age youth.

- Exhibition includes discussions with youth based on their knowledge of the care and raising of the animal.

- Exhibitors show in a non-competitive setting for participation only.

- Age, size, and temperament of animal projects must be appropriate for the exhibitor's age and size.

- Horse projects and/or horseless projects are not allowed or an option for Clover kids. They are not allowed to handle, ride, or participate in or at 4-H events.
